

# UVHS Learning Through Enrichment

## Feed The Birds

Feeding birds from your hand requires **patience** and **perseverance**

This isn't a project to complete in a few minutes, a few hours or even a few days, but it is **very rewarding**.

**Day 1-3** : Put food out for the birds and **watch them eat**.

**Day 4** : Put out food and **sit outside** watching the feeding birds.

**Day 5-6** : **Move** your seat **closer** to where the birds are feeding.

**Day 7** : Remove most of the normal bird food and sit with **food on your hand** close to where they normally feed. **Be patient!**
