

# UVHS Learning Through Enrichment

## The World Inside My House

- ✓ Explore the human and physical (natural) geography inside your house.
- ✓ Now we have lived through lockdowns, worked from home and even celebrated Christmas and birthdays in unusual ways, why not have a look at how well connected your household is to the outside world.
- ✓ These connections can be physical, digital or emotional connections.

### What do I need to do?

- ✓ Produce a collage (any shape or size) to show how your house (and the things in it) are connected to geography.
- ✓ There are some ideas to the right if you need some inspiration!
