

Have you seen what your future could have in store?

Join BP as a shipping cadet and you'll become an officer in one of the world's biggest shipping fleets. You'll travel the world, study for internationally recognised qualifications and have an exciting, varied career. Our cadets choose one of three paths:

- ▶ Deck cadets learn to navigate ships and manage cargo.
- ▶ Engineering cadets are taught to look after the ship's huge engines and other machinery on-board.
- ▶ Electro-technical cadets learn to maintain the electronic and electrical systems on-board – from radios to navigational equipment.

To find out more, including what life is like on-board and where your career could take you, visit:
