## Blurb

Only the right name gives beings and things their reality. A wrong name makes everything unreal. That's what lies do.

Bastian is nobody's idea of a hero, least of all his own. Through the pages of an old book he discovers a mysterious magical world - a world of dragons, monsters, witches and giants. A world that is doomed unless a human can save it. Can Bastian succeed in battling terrible foes and find the strength he needs to give the Empress a new name?

The epic and unforgettable classic fantasy adventure which has captured the hearts of readers of all ages and inspired the much-loved, immersive 1984 movie.

## Polly's Review

This is one fantastic book, it really makes the statement true that when you're reading a book, you feel like you're inside it, witnessing the story first-hand. This is a real page turner of a book; it was a struggle to put it down. It has adventure, fantasy and even a little bit of sadness. I strongly recommend this incredible book to anyone that wants a good read. It really does make you feel like you are there with all the characters.
